## Fatal Occupational Injuries in New York City – 2015

Fatal work injuries totaled 74 in 2015 for New York City, the U.S. Bureau of Labor Statistics reported today. Chief Regional Economist Martin Kohli noted that the number of work-related fatalities in New York City declined by five from the previous year. Fatal occupational injuries in the city have ranged from a high of 191 in 1993 to a low of 56 in 2013. (See [chart 1](#).)

Nationwide, a total of 4,836 fatal work injuries were recorded in 2015, a slight increase from the 4,821 fatal injuries in 2014, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

**Chart 1. Total fatal occupational injuries, New York City, 2006–2015**

Source: U.S. Bureau of Labor Statistics.

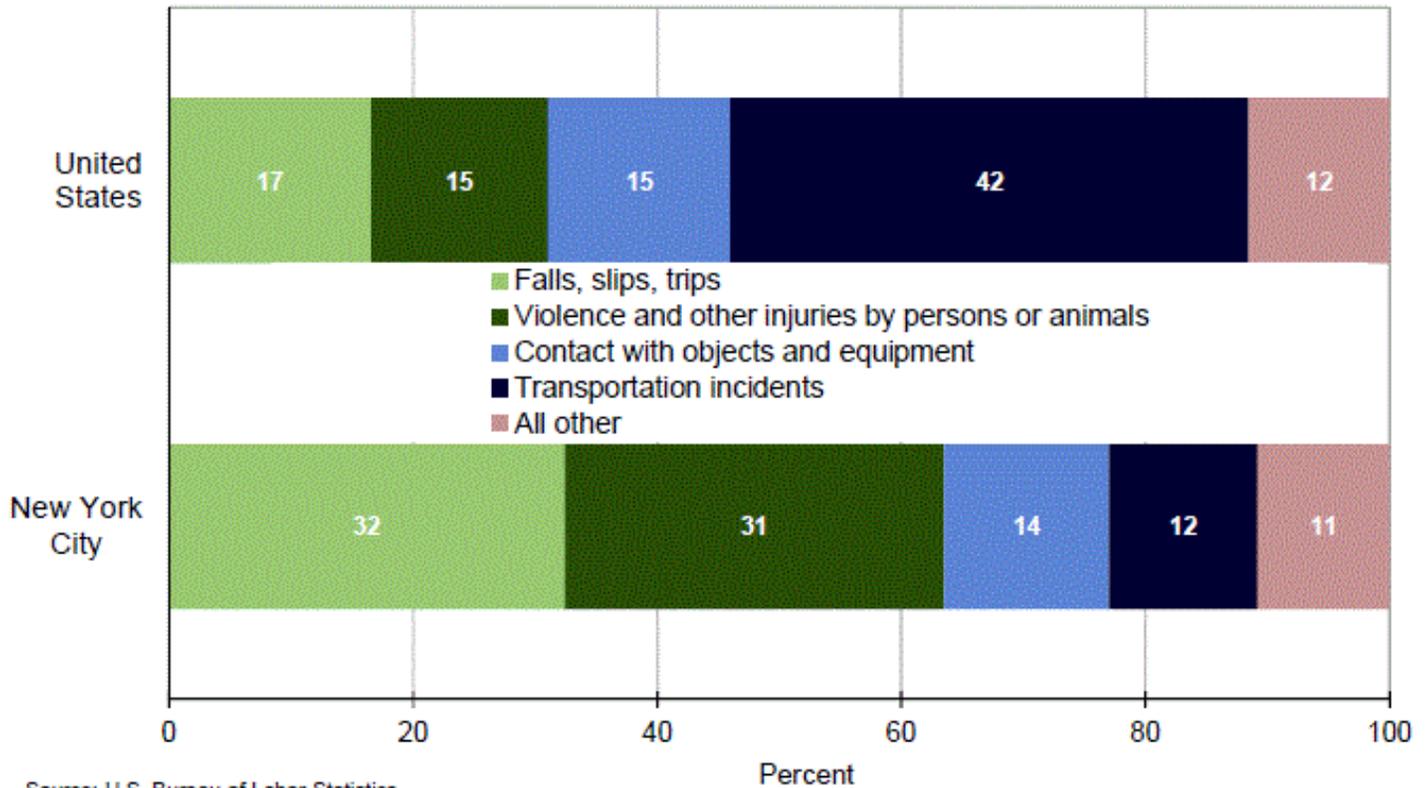

### Type of incident

In New York City, falls, slips, and trips accounted for 24 fatal work injuries and violence and other injuries by persons or animals resulted in 23 fatalities. These two major categories accounted for 63 percent of all workplace fatalities in New York City. (See [table 1](#).) The number of worker fatalities due to falls, slips, and trips increased by four over the year and deaths from violence and other injuries by persons or animals was little changed from the previous year.

Contact with objects and equipment was the third-most frequent fatal work event with 10 fatalities, up from 8 during the prior year. Exposure to harmful substances or environments resulted in six work-related deaths, little changed from 2014.

Nationally, transportation incidents were the most frequent fatal workplace event in 2015, accounting for approximately 42 percent of fatal work injuries. (See [chart 2.](#)) Falls, slips, or trips was the second-most frequent type of event (17 percent), followed by contact with objects and equipment (15 percent) and violence and other injuries by persons or animals (15 percent).

**Chart 2. Fatal occupational injuries by selected event, United States and New York City, 2015**

### Industry

The private construction industry sector had the largest number of workplace fatalities in New York City with 25, up from 22 in the previous year. Specialty trade contractors accounted for 17, or 68 percent, of the fatal injuries in this industry.

Trade, transportation, and utilities had 15 workplace fatalities, down from 20 in the previous year. (See [table 2.](#)) Violence and other injuries by persons or animals were the most frequent fatal event in the trade, transportation, and utilities sector with 11 worker deaths. Over one-third of those fatally injured in this sector worked in retail trade.

### Occupation

Construction and extraction occupations (23) and transportation and material moving occupations (14) had the highest number of workplace fatalities. (See [table 3.](#)) The majority of the fatalities within the construction and extraction group were construction trades workers (18). Motor vehicle operators accounted for 11 of the 14 fatalities among transportation and material moving workers.

## Contracted workers

A contractor is defined as a worker employed by one firm but working at the behest of another firm that exercises overall responsibility for the operations at the site of the fatal injury. In 2015, New York City had 18 fatally-injured workers identified as fitting the contractor criteria, up from 14 in 2014.

## Additional highlights

- Men accounted for 95 percent of the work-related fatalities in New York City, similar to the 93-percent national share. (See [table 4](#).) Violence and other injuries by persons or animals made up 31 percent of the fatalities for men in New York City.
- Hispanics or Latinos accounted for 36 percent of those who died from a workplace injury. Nationwide, this group accounted for 19 percent of work-related deaths.
- Workers 25-54 years old accounted for 66 percent of the city's work-related fatalities in 2015, compared to 57 percent of on-the-job fatalities nationally.
- Of the 74 fatal work injuries in New York City, 84 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for wage and salary workers was falls, trips, and slips. Violence and other injuries by persons or animals was the most frequent fatal event for the self-employed.

### Change in the Census of Fatal Occupational Injuries (CFOI) News Release Schedule

Beginning with the 2015 reference year, CFOI will publish a single, annual release with no revisions. A similar schedule will be followed in subsequent years. Preliminary releases, which normally appeared in August or September in past years, will no longer be produced.

## Technical Note

**Background of the program.** The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2015 data, over 21,400 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS web site at [www.bls.gov/opub/hom/pdf/homch9.pdf](http://www.bls.gov/opub/hom/pdf/homch9.pdf).

**Federal/State agency coverage.** The Census of Fatal Occupational Injuries includes data for all fatal work injuries, whether the decedent was working in a job covered by the Occupational Safety and Health Administration (OSHA) or other federal or state agencies or was outside the scope of regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency.

**Acknowledgments.** The Bureau of Labor Statistics appreciates the efforts of all federal, state, local, and private sector entities that submitted source documents used to identify fatal work injuries, in particular the New York City government.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

## Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

Note: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

## Footnotes:

(1) Occupation data are based on the Standard Occupational Classification system, 2010.

Note: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

**Table 4. Fatal occupational injuries by worker characteristics, New York City, 2014–15**

| Worker characteristics                        | 2014   | 2015   |         |
|---|--------|--------|---------|
|   | Number | Number | Percent |
| Total .....                                   | 79     | 74     | 100     |
| <b>Employee status</b>                        |        |        |         |
